Work Experience

Dcodax Technologies, Islamabad

December 2021 - Present

Flutter Team Lead

- Developed 7+ company products, including VPN apps, AI image generation, period trackers, and multi-restaurant food delivery systems
- Managed 30+ client projects and led a team of 7 Flutter developers to deliver high-quality mobile solutions.
- Automated workflows with Xcode Cloud (iOS) and GitHub Actions (Android), streamlining app publishing on App Store Connect and Google Play Console.
- Integrated RevenueCat, Mixpanel, AppFlyer, in-app purchases, OpenVPN, Wireguard, Firebase, AdMob and AWS for robust app functionality.

Secure Hops, Lahore

January 2021 - November 2021

Flutter Developer

- Developed 2 company products, including Quiz Management, Food Delivery Solution
- Managed 5+ client projects and deliver high-quality mobile solutions.
- Worked on Firebase, NodeJs, AWS and much more.

Education

COMSATS University Sahiwal September 2017 - June 2021

B.S Software Engineering

Project Work

- **GuardX VPN** Developed a robust VPN app featuring OpenVPN and Wireguard protocols, adblocker, threat protection, auto-connect, split tunneling and speed test. Integrated RevenueCat for subscriptions and Mixpanel for analytics, enhancing user engagement and monetization.
- **FeastFlow:** Created a multi-vendor food delivery solution with user, driver, and restaurant apps, serving 20+ successful active clients. Leading ongoing efforts to transition the product into a scalable SaaS-based platform.
- **F1® Race Programme** Collaborated with a world-renowned company to develop the official digital Formula 1® Race Programme, a 30+ year iconic publication now digitized. Delivered features including exclusive news, driver standings, race schedules, interactive track maps, photo/video galleries, and championship updates, enhancing the Grand Prix experience for users.
- **Flow & Glow:** Built a period tracking app to log cycles, symptoms, weight, and temperature, with suggested blogs for users. Currently developing a pregnancy tracker module to expand functionality.
- **vpn_permission:** Authored and published a unique Flutter package on pub.dev to manage VPN permissions, addressing a gap in existing solutions and simplifying permission handling for developers.
- **Moonport:** Developed an advanced crypto calculator app allowing users to predict future cryptocurrency balances and save 'what if' scenarios. Enabled portfolio management with over 10,000 coins, market cap comparisons, and price target visualizations, enhancing strategic investment planning.
